

JAVA Development Kit Installation Steps

Please review all concepts of C & C++ Programming before JAVA session start.

Step 1:

Go to below link download JDK 21 as per your version 32bit or 64 bit (as its latest LTS version).

Direct Download: https://download.oracle.com/java/21/latest/jdk-21_windows-x64_bin.exe

or

<https://www.oracle.com/java/technologies/downloads/>

Tools and resources Java downloads Java archive

JDK 23 **JDK 21** GraalVM for JDK 23 GraalVM for JDK 21

JDK Development Kit 21.0.5 downloads

JDK 21 binaries are free to use in production and free to redistribute, at no cost, under the [Oracle No-Fee Terms and Conditions \(NFTC\)](#).

JDK 21 will receive updates under the NFTC, until September 2026, a year after the release of the next LTS. Subsequent JDK 21 updates will be licensed under the [Java SE OTN License \(OTN\)](#) and production use beyond the [limited free grants](#) of the OTN license will [require a fee](#).

Linux macOS **Windows**

Product/file description	File size	Download
x64 Compressed Archive	185.91 MB	https://download.oracle.com/java/21/latest/jdk-21_windows-x64_bin.zip (sha256)
x64 Installer	164.28 MB	https://download.oracle.com/java/21/latest/jdk-21_windows-x64_bin.exe (sha256)
x64 MSI Installer	163.03 MB	https://download.oracle.com/java/21/latest/jdk-21_windows-x64_bin.msi (sha256)

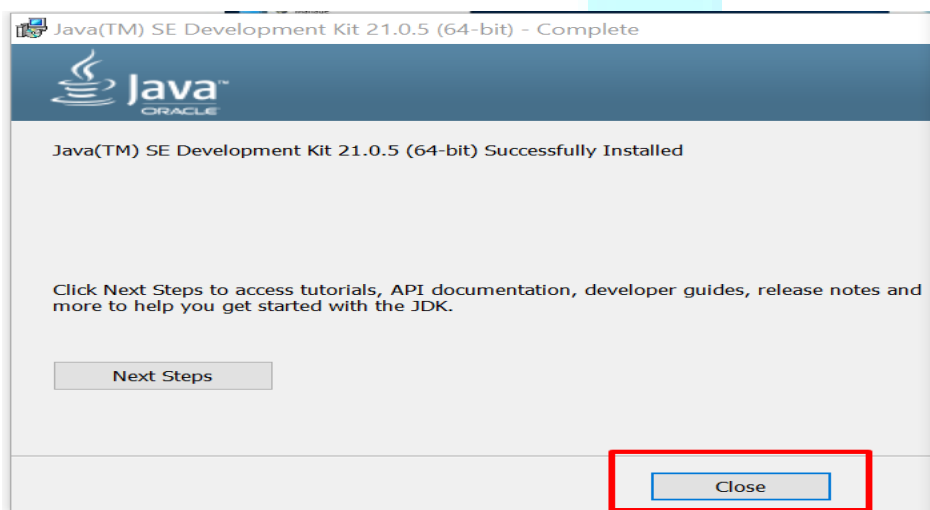

Documentation Download

Step 2: Once JDK downloads completes,

Run the .exe for installing, Click next.

Step 3: Once installation completes, click close

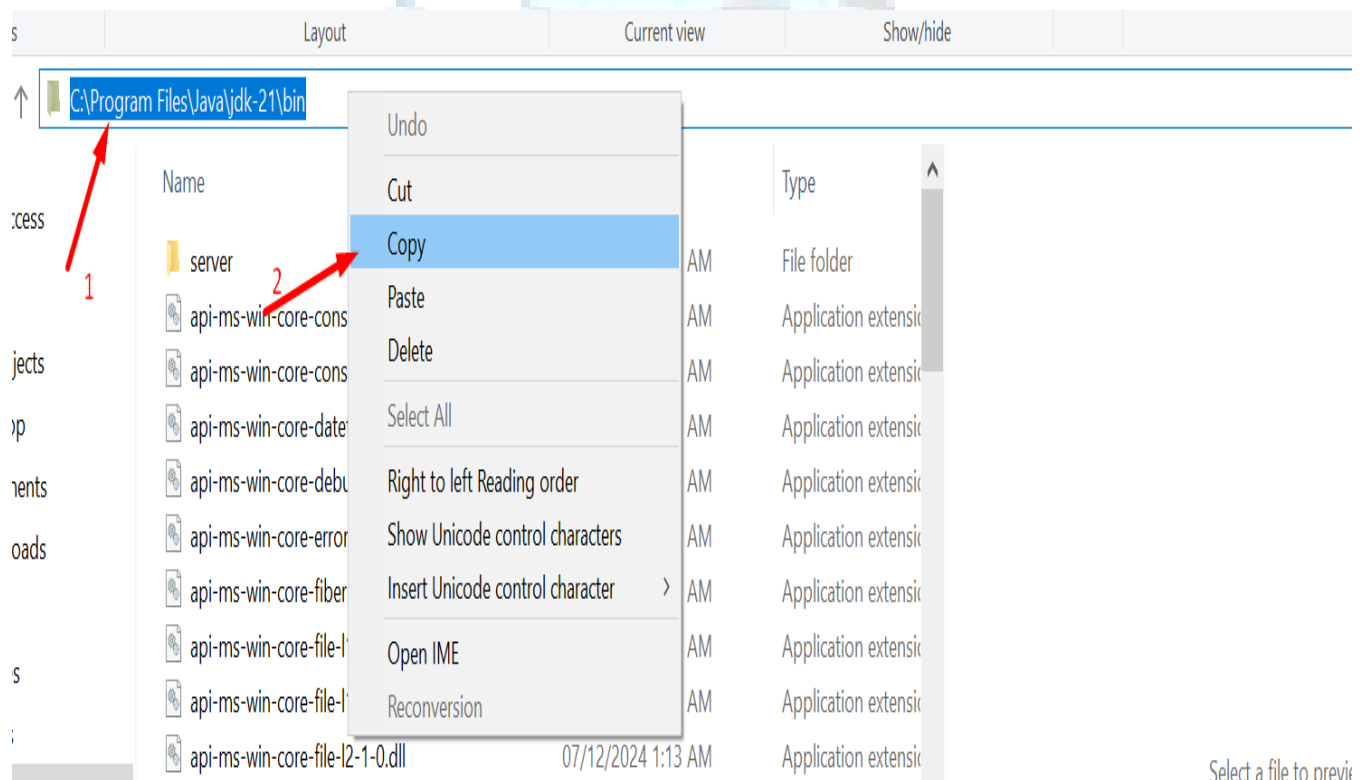

After successful installation of JDK , we have to set class path for java.

Here the PATH variable gives the location of executable like javac, java etc.

The CLASSPATH variable gives location of the library files

Steps to set the PATH & CLASSPATH

Prerequisite: Copy the path of bin folder where our JDK is actually installed

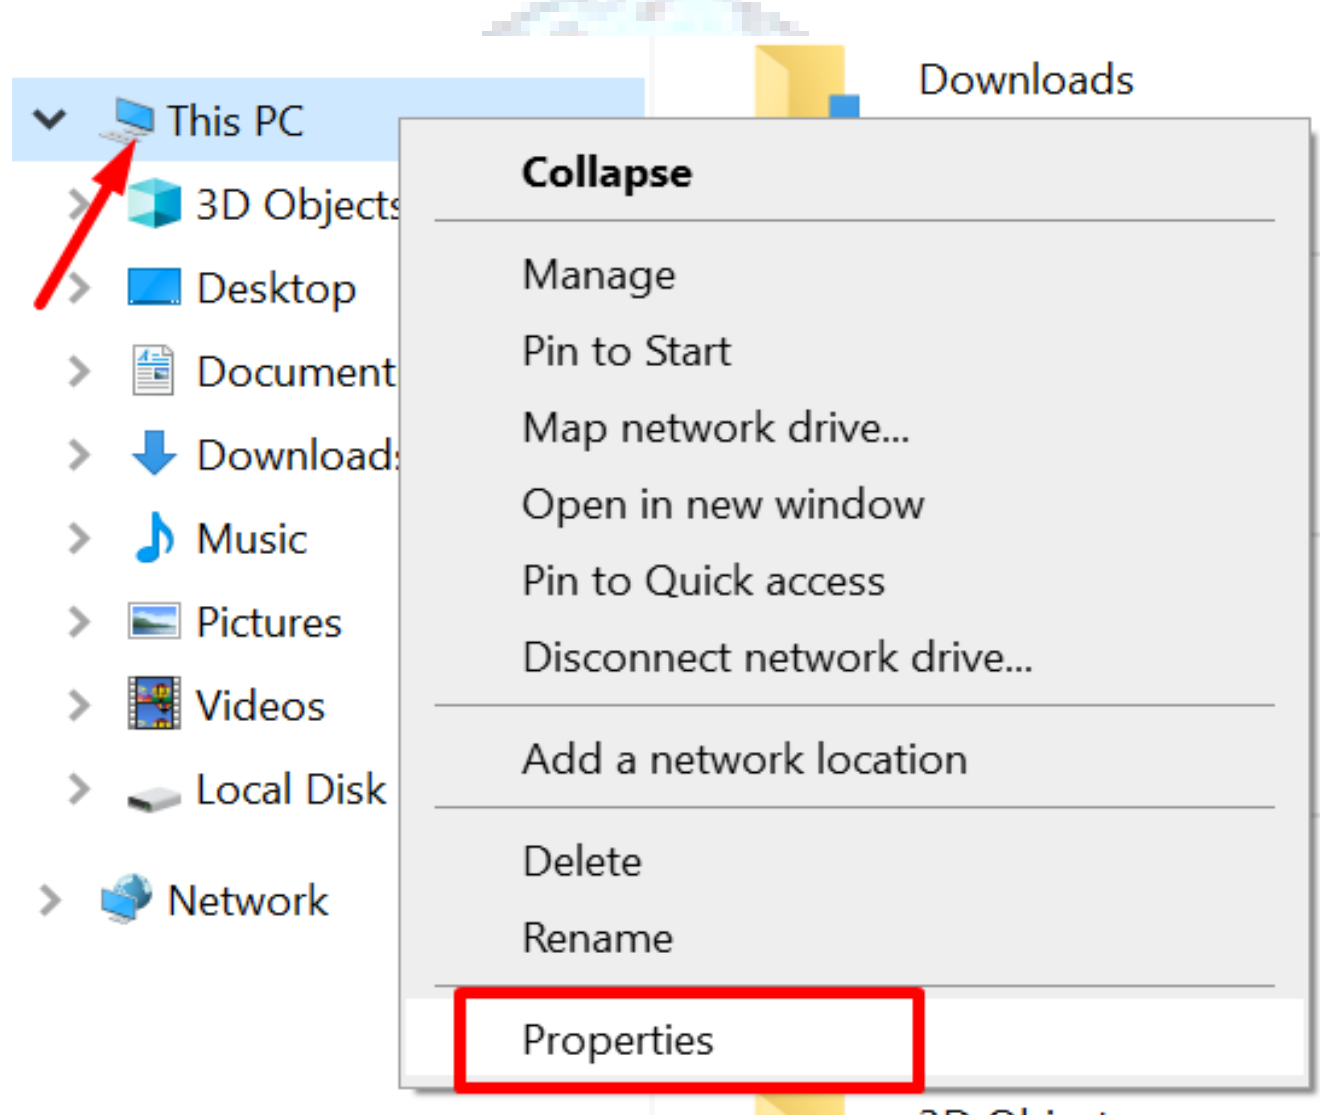

eg: **C:\Program Files\Java\jdk-21\bin**

Follow the below steps carefully

Step 1: press

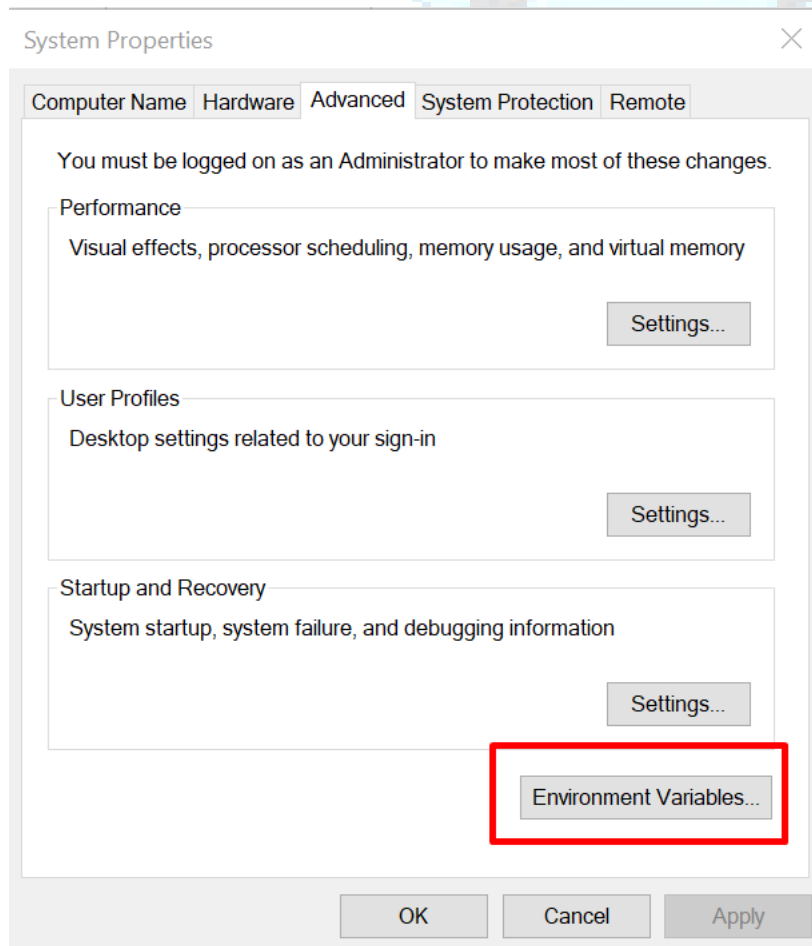

Right click on the My Computer or This PC & Select the properties

Step 2: Click on Advanced System Settings

Step 3: Click on Environment Variables

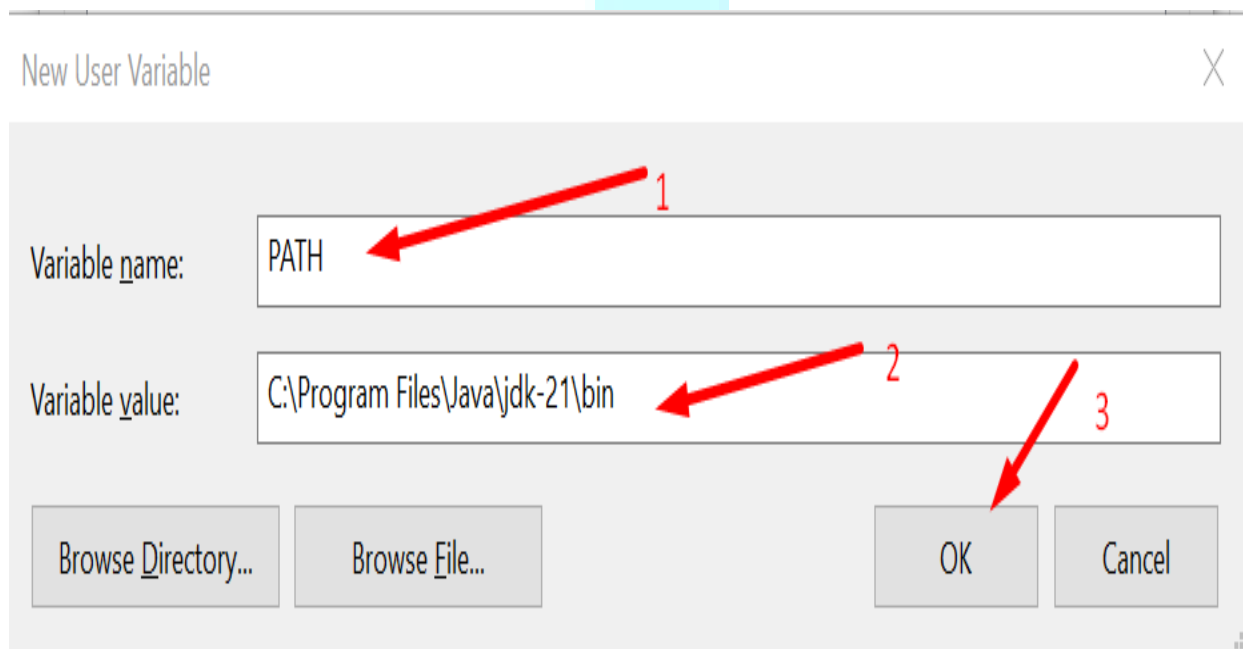

Step 4: check **PATH** variable is there or not

a. if **PATH** variable is **Not** then Click **New..** Button from User variables. (shown in above image).

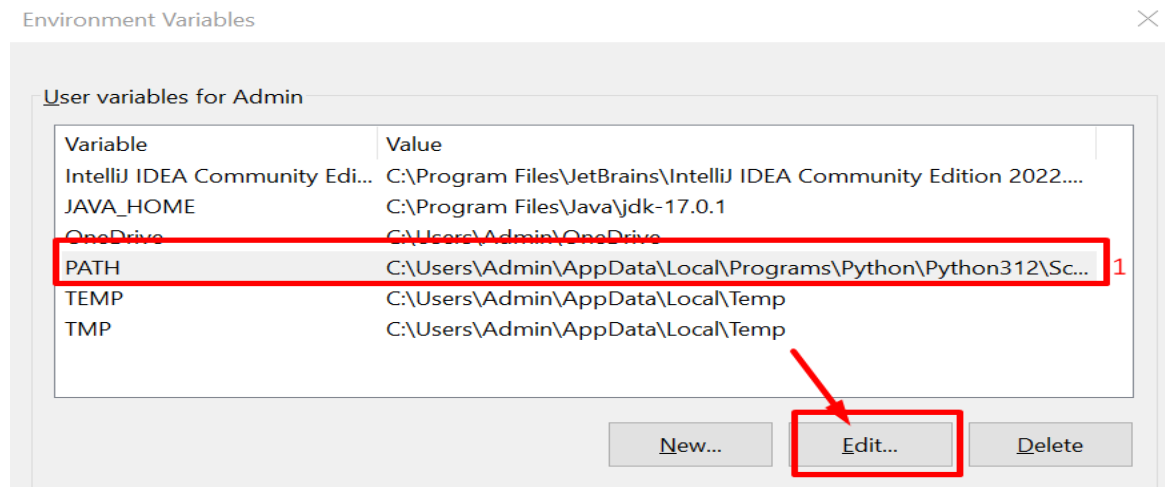

Type **PATH** in variable name

Paste the path where the JDK is installed i.e. as shown below. : **C:\Program Files\Java\jdk-21\bin**

b. if **PATH** variable is then

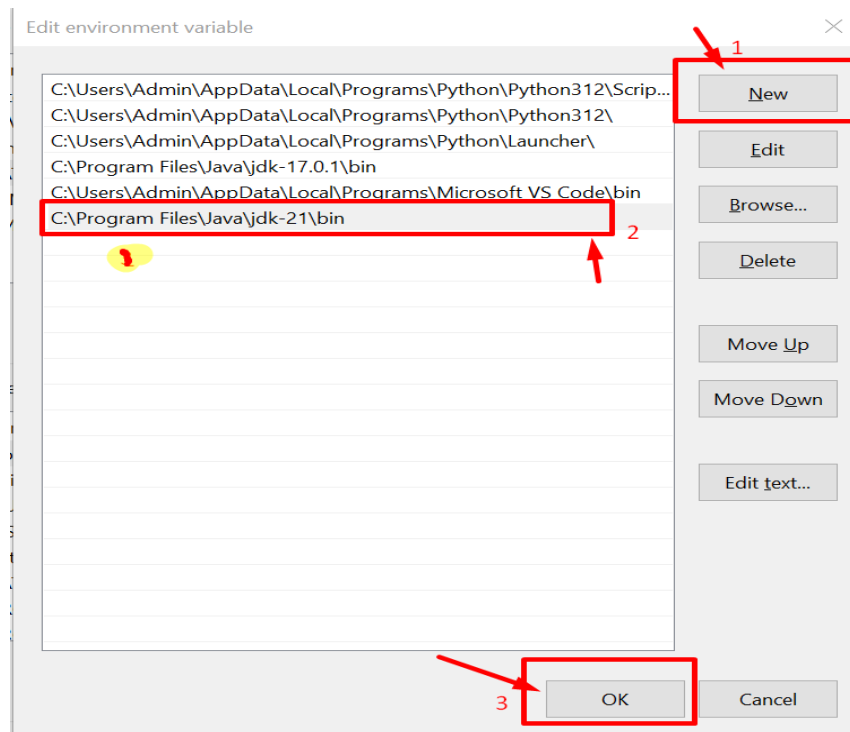

select the **PATH** & Click **Edit..** Button from User variables.

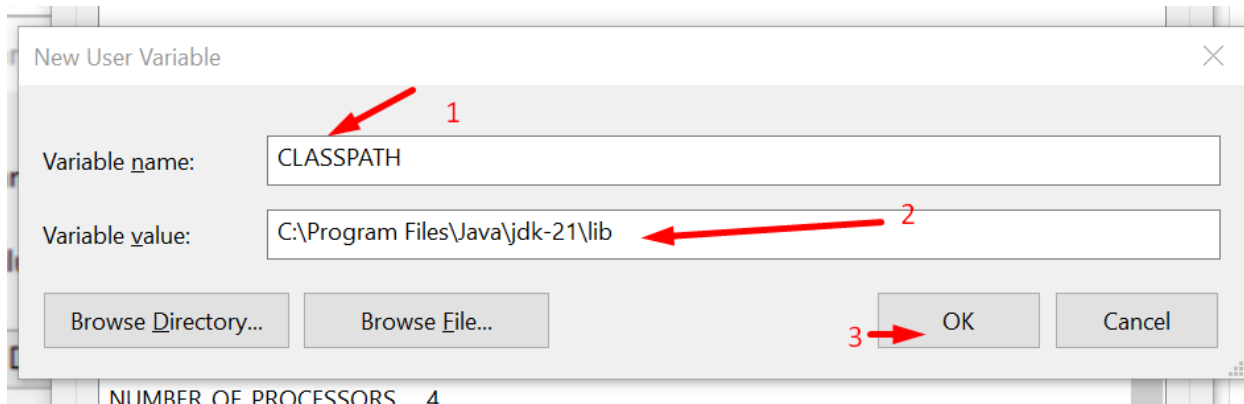

Click on **New**.

Paste the path where the JDK is installed i.e. as shown below. : **C:\Program Files\Java\jdk-21\bin**

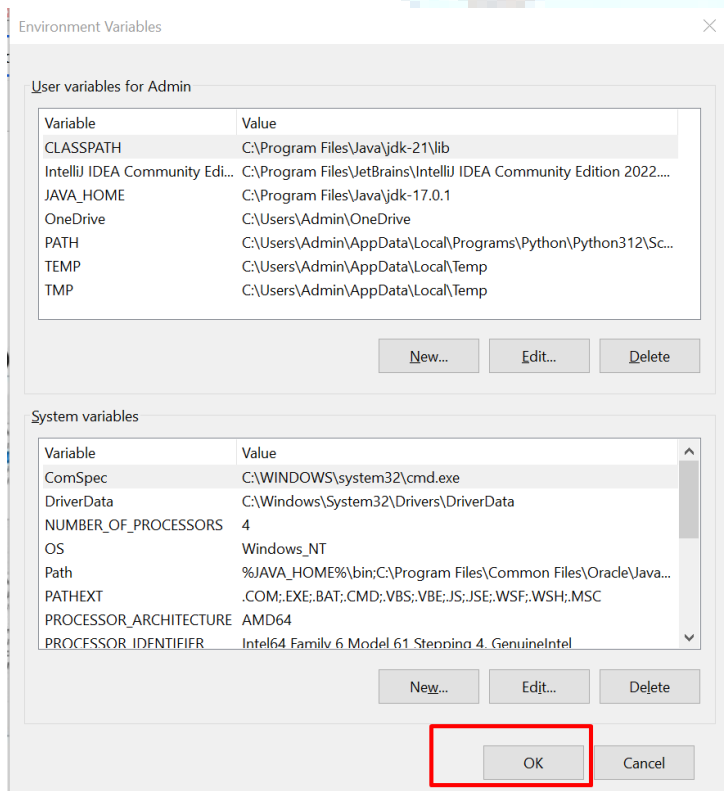

Click **OK**.

Step 5: You can follow similar steps to set CLASSPATH

Step 6: Click OK.

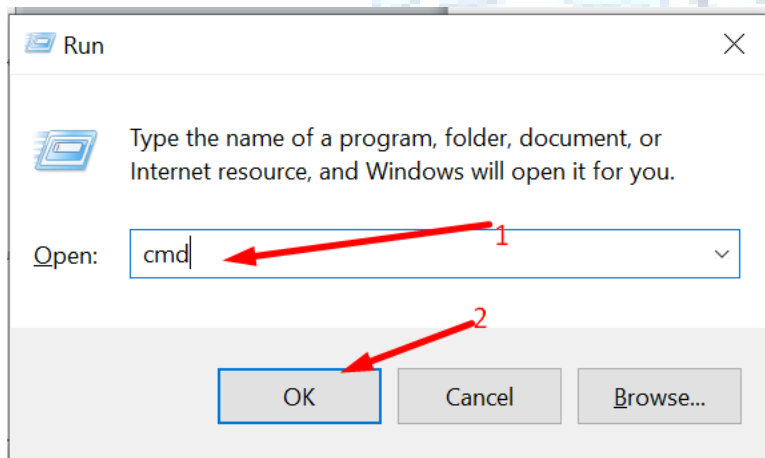

Step 7: Open the command prompt and check whether the java is installed or not properly

Press

Then type cmd in Run dialog and click ok

Step 8: Type below command

java -version

if you see output on command prompt as below , then our java is installed properly

```
C:\WINDOWS\system32\cmd.exe
Microsoft Windows [Version 10.0.19045.5131]
(c) Microsoft Corporation. All rights reserved.

C:\Users\Admin>java -version
java version "21.0.5" 2024-10-15 LTS
Java(TM) SE Runtime Environment (build 21.0.5+9-LTS-239)
Java HotSpot(TM) 64-Bit Server VM (build 21.0.5+9-LTS-239, mixed mode, sharing)

C:\Users\Admin>
```

Step 9:

Lets go 😊

Start Programming.....Hello JAVA
